The Pleasantville NY DMS switch will be the recipient office of traffic migrated from the Croton on Hudson NY DMS switch. Traffic bound for the code listed in Table B will be delivered via the White Plains 08T Tandem (WHPLNYWP08T intra-lata SHA / WHPLNYWP08T inter-lata FG Access SHA).

After all traffic is migrated off of the Croton on Hudson NY DMS switch, this switch will be retired and removed from the network.

CLECs, IXCs, IECs, and wireless and paging carriers will need to secure new trunk groups built to the Pleasantville NY DMS switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunk (DEOT) with access connectivity in the Croton on Hudson NY DMS switch will be required to reposition the codes to the Pleasantville NY DMS switch.

All ASRs for the Pleasantville NY DMS switch must be received no later than November 1, 2022 to provide sufficient time to migrate the traffic described above. All traffic must be moved by January 3, 2023 per LERG. All ASRs for the Pleasantville NY DMS switch must carry the project code of **CRHDNYCHDS0**.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Croton on Hudson NY DMS switch.
