CLECs, IXCs, IECs, wireless carriers, and paging carriers will need to secure new trunk groups built to the Lowell, MA PEO switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunks (DEOT) with access connectivity in the Dracut, MA DMS10 switch will be required to reposition the codes to the Lowell, MA PEO switch.

All ASRs for the Lowell, MA PEO switch must be received no later than April 14, 2023 to provide sufficient time to migrate the traffic described above. All traffic must be moved by June 1, 2023. All ASRs for the Lowell, MA PEO switch must carry the project code of DRCTMAMMDS0.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Dracut, MA DMS10 switch.
