## Subject : Verizon Partner Solutions Industry Letter: Brookland, DC 5E Switch Retirement

### PLEASE NOTE:

- All references to the Brookland DC 5E switch are associated with CLLI code WASHDCBKDS0 and will not be repeated throughout this letter.
- All references to the Southwest DC CS2K switch are associated with CLLI code WASHDCSWPS0 will not be repeated throughout this letter.

As set out in the Verizon Washington, DC Inc. Public Notice of Network Change under Rule 51.329(a), dated December 1, 2022, on or after July 3, 2023, the Brookland DC 5E switch will be retired and removed from the Verizon network.

**General Information:** The Brookland DC 5E switch will be replaced by the Southwest CS2K switch. See details in Table A.

## Table A

Description	From	To
Office Name	Brookland	Southwest
CLLI Code	WASHDCBKDS0	WASHDCSWPS0
Switch Type	5E	CS2K
Location	1039 Lawrence Street N.E. Washington, DC 20017	30 E Street S.W. Washington, DC 20024
Point Code	246 193 136	246 193 153
NXX Type	EOC	EOC
OCN	9211	9211
Rate Center LATA	236	236
Rate Center	WSHNGTNZN1	WSHNGTNZN1
State	DC	DC

The Exchange codes (NXXs) in Numbering Plan Area (NPA) 202 currently residing in the Brookland DC 5E switch will be rehomed upon decommissioning of the switch and reflected in the Local Exchange Routing Guide (LERG) on or after July 3, 2023. See details in Table B.

## Table B

NPA	NXX	TYPE	Switch
202	269	EOC	Brookland
202	281	EOC	Brookland
202	526	EOC	Brookland
202	529	EOC	Brookland
202	635	EOC	Brookland
202	636	EOC	Brookland
202	832	EOC	Brookland

### Network Changes and Trunk Rearrangements:

The Southwest DC CS2K switch will be the recipient of office traffic migrated from the Brookland DC 5E switch. Traffic to be migrated to the Southwest DC CS2K switch includes all of the traffic currently handled by the Brookland DC 5E switch including, but not limited to, inter-LATA access traffic (including Feature Groups B and D traffic), and intra-LATA and local

traffic (including CLEC, IEC, wireless and Verizon sector end-office switched traffic). After all traffic is migrated off of the Brookland DC 5E, this switch will be retired and removed from the network.

All CLECs, IXCs, IECs, ILEC, wireless carriers and paging carriers will need to provision new trunk groups to support direct end-office trunking to the Southwest DC CS2K switch. Carriers with existing trunk groups to this switch will need to augment if necessary. Carriers that have direct end office trunks (DEOT) with access connectivity in the Brookland DC 5E switch will be required to reposition the codes to the Southwest DC CS2K switch.

All ASRs for the Southwest DC CS2K switch must be received no later than **May 22, 2023** to provide sufficient time to migrate the traffic described above. All traffic must be moved on or after **July 3, 2023** based on LERG change notification. ASRs for the Southwest DC CS2K switch must carry the project code of **WASHDCBKRPO**.

Upon decommissioning of the Brookland DC 5E switch, the seven (7) NPA NXXs that currently reside in the Brookland DC 5E switch will reflect the Southwest DC CS2K switch in the LERG.

Submission of disconnect ASRs to Verizon for the Brookland DC 5E switch are required immediately after the re-homing of traffic is complete.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Brookland DC 5E switch.

For inquiries related to the proposed network reconfiguration, or to arrange a meeting with Verizon Network Engineering and Planning personnel, please contact your Verizon Account Manager.

We look forward to working with your team to enable uninterrupted service during the network redesign and transitioning of your traffic.
