After all traffic is migrated off of the Seaside Park NJ DMS100 switch, this switch will be retired and removed from the

network.

CLECs, IXCs, IECs, wireless carriers and paging carriers will need to secure new trunk groups built to the New Brunswick NJ C20 switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunk (DEOT) with access connectivity in the Seaside Park NJ DMS100 switch will be required to reposition the codes to the New Brunswick NJ C20 switch.

All ASRs for the New Brunswick NJ C20 switch must be received no later than July 21, 2023 to provide sufficient time to migrate the traffic described above. All traffic must be moved by September 1, 2023. All ASRs for the New Brunswick NJ C20 switch must carry the project code of **LVLTNJSPDS5**.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Seaside Park NJ DMS100 switch.
