### Network Changes and Trunk Rearrangements:

The Camden NJ CS2K switch will be the recipient office of traffic migrated from the Hopewell NJ 5ESS switch. Traffic bound for the codes listed in Table B will be delivered via the Camden 05T Tandem (CMDNNJCE05T).

After all traffic is migrated off of the Hopewell NJ 5ESS switch, this switch will be retired and removed from the network.

CLECs, IXCs, IECs, wireless carriers and paging carriers will need to secure new trunk groups built to the Camden NJ CS2K switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunk (DEOT) with access connectivity in the Hopewell NJ 5ESS switch will be required to reposition the codes to the Camden NJ CS2K switch.

All ASRs for the Camden NJ CS2K switch must be received no later than October 1, 2023 to provide sufficient time to migrate the traffic described above. All traffic must be moved by November 1, 2023. All ASRs for the Camden NJ CS2K switch must carry the project code of HPWLNJHPDS5.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Hopewell NJ 5ESS switch.
