CLECs, IXCs, IECs, wireless carriers, and paging carriers will need to secure new trunk groups built to the Newton, MA C20 switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunks (DEOT) with access connectivity in the Orange, MA DMS10 switch will be required to reposition the codes to the Newton, MA C20 switch.

All ASRs for the Newton, MA C20 switch must be received no later than May 15, 2024 to provide sufficient time to migrate the traffic described above. All traffic must be moved by July 1, 2024. All ASRs for the Newton, MA Packet End Office (PEO) switch must carry the project code of **ORNGMASMDS0**.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Orange, MA DMS10 switch.
