Network Changes and Trunk Rearrangements:

The New Brunswick NJ C20 switch will be the recipient office of traffic migrated from the Van Hiseville NJ DMS100 switch. Traffic bound for the codes listed in Table B will be delivered via the New Brunswick NJ 04T Tandem (NBWKNJNB04T).

After all traffic is migrated off of the Van Hiseville NJ DMS100 switch, this switch will be retired and removed from the network.

CLECs, IXCs, IECs, wireless carriers and paging carriers will need to secure new trunk groups built to the New Brunswick NJ C20 switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunk (DEOT) with

access connectivity in the Van Hiseville NJ DMS100 switch will be required to reposition the codes to the New Brunswick NJ C20 switch.

All ASRs for the New Brunswick NJ C20 switch must be received no later than June 1, 2024 to provide sufficient time to migrate the traffic described above. All traffic must be moved by August 1, 2024. All ASRs for the New Brunswick NJ C20 switch must carry the project code of **VNHSNJVHDS5**.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Van Hiseville NJ DMS100 switch.
