Network Changes and Trunk Rearrangements:

The Deerpark NY CS2k switch will be the recipient office of traffic migrated from the Setauket NY 5E switch. Traffic bound for the codes listed in Table B will be delivered via the DRPKNYDPG0T Deerpark Tandem (BRWDNYBWGT0 DRPKNYG0T intra-lata SHA / BRWDNYBWGT0 DRPKNYDPG0T inter-lata FG Access SHA).

After all traffic is migrated off the Setauket NY 5E switch, this switch will be retired and removed from the network.

CLECs, IXCs, IECs, wireless carriers, and paging carriers will need to secure new trunk groups built to the Deerpark NY CS2k switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunk (DEOT) with access connectivity in the Setauket NY 5E switch will be required to reposition the codes to the Deerpark NY CS2k switch. All ASRs for the Deerpark NY CS2k switch must be received no later than November 1, 2024 to provide sufficient time to migrate the traffic described above. All traffic must be moved by January 2, 2025 per LERG. All ASRs for the Deerpark NY CS2k switch must carry the project code of STKTNYSKDS0.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Setauket NY 5E switch.

For inquiries related to the proposed network reconfiguration, or to arrange a meeting with Verizon Network Engineering and Planning personnel, please contact your Verizon Account Manager.

We look forward to working with your team to enable uninterrupted service during the network redesign and transitioning of your traffic.
