Network Changes and Trunk Rearrangements:

The Hyattsville MD CS2K switch will be the recipient office of traffic migrated from the Suitland MD 5E switch. Traffic to be migrated to the Hyattsville MD CS2K switch includes all of the traffic currently handled by the Suitland MD 5E switch, including, but not limited to, Inter-LATA access traffic (including Feature Group B and D traffic), and Intra-LATA and local

traffic (including CLEC, IEC, wireless and Verizon-sector end office switched traffic). After all traffic is migrated off of the Suitland MD 5E switch, this switch will be retired and removed from the network.

CLECs, IXCs, IECs, ILEC, wireless carriers and paging carriers will need to provision new trunk groups built to the Hyattsville MD CS2K switch or have existing trunk groups to that switch augmented if necessary. Carriers that have direct end office trunks (DEOT) with access connectivity in the Suitland MD 5E switch will be required to reposition the codes to the Hyattsville MD CS2K switch.

All ASRs for the Hyattsville MD CS2K switch must be received no later than **May 21, 2025**, to provide sufficient time to migrate the traffic described above. All traffic must be moved on or after **July 2, 2025**, based on LERG change notification.

Upon decommissioning of the Suitland MD 5E **switch,** the nine (9) native NPA NXXs that currently reside in **the** Suitland MD 5E **switch** will reflect the Hyattsville MD CS2K switch in the LERG.

Submission of disconnect ASRs to Verizon for the Suitland MD 5E switch are required immediately after the re-homing of traffic is complete.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Suitland MD 5E switch.

For inquiries related to the proposed network reconfiguration, or to arrange a meeting with Verizon Network Engineering and Planning personnel, please contact your Verizon Account Manager.

We look forward to working with your team to enable uninterrupted service during the network redesign and transitioning of your traffic.
