

Verizon Frontline Network Slice

Providing first responders with a dedicated connection for fast, reliable communications

In emergencies, public safety relies on near-real-time communications. But when data networks are congested, the potential for data lag and delays rises.

Verizon Frontline Network Slice - Connected Vehicle puts heavy network traffic in the rearview mirror. It's a dedicated portion of our 5G Ultra Wideband network reserved exclusively for public safety agencies. First responders can rely on high-priority access to connectivity, no matter the situation.

A dedicated 5G lane for first responders

Verizon Frontline Network Slice helps keep mission-critical data moving when it matters most, even during data-intensive tasks.

Emergency response

Enhanced coordination during disasters and large events

Mobile command centers

Dependable and seamless connectivity for mobile units

Remote monitoring

Smooth public safety operations through near-real-time video and data feeds from a mobile unit

You're on a secure channel.

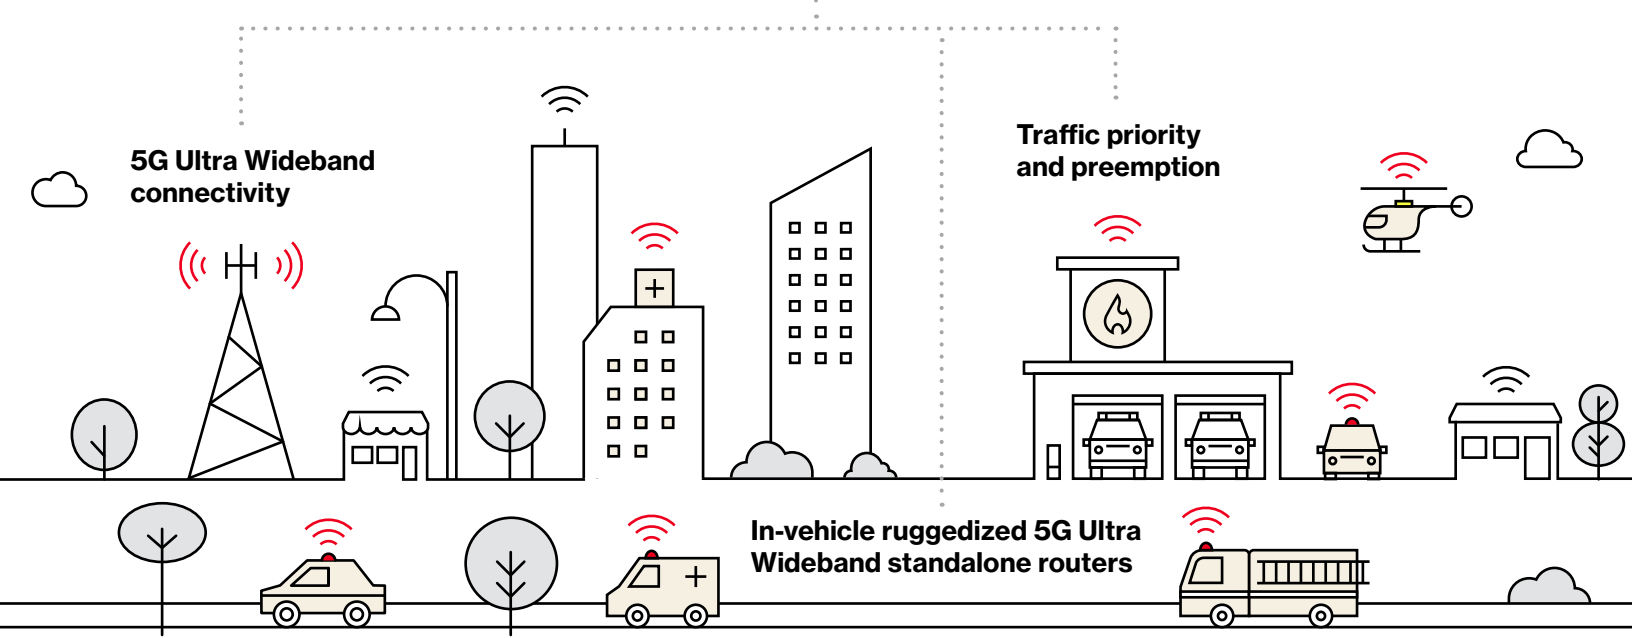

Using a 5G standalone core, Verizon Frontline Network Slice helps protect sensitive data from potential cyberthreats.

Accelerating first responder technology

Verizon Frontline Network Slice - Connected Vehicle utilizes a 5G in-vehicle router to provide consistent performance in high-traffic network conditions. The result is an enhanced mobile work environment prioritized for near-real-time information, mission-critical apps and robust connectivity.

With features such as Intelligent Bandwidth Manager, Verizon Frontline Network Slice - Connected Vehicle can help ensure first responder applications have the working bandwidth and network resources they need to operate effectively.

Verizon Frontline is the #1 network choice in public safety.¹

Built on America's most reliable 5G network²

Why Verizon

Your mission is our purpose. Verizon Frontline is the advanced network and technology for first responders. For over 30 years, Verizon has been supporting first responders with future-ready solutions that equip them with the best technology available, so they can be mission-ready today and tomorrow.

Talk to your Verizon Frontline Representative today to empower first responders with their own slice of the network.
