

A communication lane just for first responders

Verizon Frontline Network Slice - Connected Vehicle delivers the security and advanced network connectivity needed by public safety agencies.

Challenge

Connected vehicles are essential for first responders. But when data networks are congested, accessing vital resources becomes difficult. The effectiveness of your first-response capability depends on the network your vehicles rely on.

Solution

Verizon Frontline Network Slice - Connected Vehicle provides the reliable connectivity first responders need. It's a partition on the 5G Ultra Wideband network dedicated exclusively to public safety agencies that offers low latency, even in times of network congestion, and security. It's the fast, reliable connection first responders need to coordinate operations during incidents, monitor near-real-time videos, and use data-intensive applications and devices.

Benefits

Helping you protect and serve

Verizon Frontline Network Slice - Connected Vehicle supports law enforcement's need for data-intensive connectivity in the field. Because this network slice is dedicated to public safety agencies, communications are more reliable. This can help first responders:

- Meet high-bandwidth needs for applications, such as real-time video surveillance and face ID software
- Coordinate deployment of officers and equipment without data interruption

Answering the call

At the scene, conditions can change in an instant. Verizon Frontline Network Slice - Connected Vehicle delivers the reliability and connectivity first responders need to meet evolving situations. This can help first responders:

- Access building schematics, hazardous material information and other digital assets
- Direct on-the-ground firefighting efforts

Helping improve outcomes for patients

Every second is vital in a medical emergency. Verizon Frontline Network Slice - Connected Vehicle helps medical responders securely transmit data. This can help first responders:

- Transmit patient status in real time to hospitals
- Coordinate ambulance transport quickly and reliably
